## me

sr. software engineer with **8 years** of experience building scalable (and occasionally clever) solutions mainly for payment processing & fraud-fighting

## exp-highlights

- **itv (uk)** - ml/mlops on aws for channel audience forecasting (2025/aug 2026)
- **signifyd (us - award winner tenacious feb/2024)** - ml eng. for loss forecasting & risk-analysis on databricks (2023/2024)
- **elemeno AI (us - br client bvmf: AMER3)** - mlops engineer with k8s on gcp (2021/2022)
- **broad (uk - YC W21)** - sr. software engineer with scala for digital banking on gcp (2020)
- **stone (br: nasdaq: STNE)** - ml & software engineer with scala on aws (2017-2019)
- **LIOC (br: UFRJ/COPPE)** - ocean instrumentation lab - scientific research, ROV, microcontrollers (2016/2017)

## core

Scala Python Machine Learning Claude Code Nix SQL Apache Airflow

## high-end

Apache Kafka Apache Spark PySpark Delta Lake Databricks Akka / Pekko CUDA

## machine learning

scikit-learn MLflow Kubeflow Amazon SageMaker XGBoost PyTorch Optuna

## llm & agents

MCP A2A DSPy RAG Ollama OpenCode Hugging Face LoRA / DPO fine-tuning Langfuse

## cloud & infra & etc

AWS Amazon S3 Amazon EC2 Amazon EKS Amazon EMR Amazon Kinesis Amazon Redshift Amazon DynamoDB AWS Glue

Kubernetes Docker OpenTelemetry Prometheus Grafana dbt

## nix labs

self-contained nix flakes for the toolchains i work in, at nix-config: one directory per lab, consumed by other repos as a flake input, a sparse submodule or a github action.

| lab       | what                                                                                          | nixpkgs | locked                  | toolchain                                                                                                                   |
